IDENTIFIERS *Illinois

ABSTRACT

Fall 1979, "end-of-registration" enrollment data were gathered for the 51 Illinois public community colleges and compared with data from earlier years. Selected findings indicate that while headcount enrollment increased from 322,267 in Fall 1978 to 323,653 in Fall 1979 (+0.4%), full-time equivalent enrollments decreased from 143,234 to 142,514 (-0.5%). Full-time student enrollment decreased for the fourth consecutive year from a high of 100,409 in Fall 1975 to 80,854 in Fall 1979; the number of part-time students was 242,799 (an increase of 1.3% from Fall 1978), constituting 75% of the total enrollment. Demographic data indicate that: (1) female enrollment (180,479) increased by 1.3% from Fall 1978, while male enrollment dropped from 143,491 to 143,174; (2) 53% of the students were 24 years of age or older; (3) 74.5% were white, 18.2% were Black, 5.1% were Hispanic, 1.7% were Asian, and 0.5% were American Indian or Alaskan. Most students (66%) enrolled in day courses, 31.9% attended evening classes, and 2.1% were enrolled in weekend courses. Baccalaureate programs suffered a 10.9% decrease in enrollment from Fall 1978; the most popular transfer curricula were liberal arts, business, and natural science. Vocational enrollments increased by 0.8%; nursing, secretarial technologies, and accounting programs had the highest enrollments. Data tables are provided throughout the report. (JP)

PREFACE

It is very important for local and State officials to have accurate and comprehensive data on the students enrolled in each community college. Such data are not only valuable for reviewing historical trends and the current status of student enrollment, but also for future planning regarding programs, facilities, and financing.

The enrollment data for the Illinois public community colleges are reported to the Illinois Community College Board (ICCB) MIS in machine readable form (either IBM cards or tape) with a data card of information on each individual student. These data become a part of the ICCB MIS Student Data Base from which the various enrollment reports and distributions are generated. In addition to generating the fourteen tables required by the Illinois Board of Higher Education (IBHE) for the community colleges, the ICCB MIS produces the detailed tables required by the National Center for Educational Statistics. The student data base also allows additional special studies and analyses for special purposes. Enrollment reported as of a census date, which is the last day of fall term, were used for consistency with previous years and other institutions. Student enrollment in short-term classes that begin after the regular "end-of-registration" period of the fall term are not included in this report.

The summary of student enrollments in the various instructional program offerings is included in this report. Previously the curriculum enrollment report was a separate report which required an additional data submission by the colleges. By adding the curriculum identifier to the enrollment data, curriculum enrollment can be obtained from the student data base. Not only does this save one extra data submission but it also enables the curriculum enrollment data to match exactly the fall enrollment reports. In addition, the student data base can be used for analysis of the enrollments in any program area by age, sex, ethnic origin, or any other student characteristic.

The fall term (10th day) enrollments are based on the number of students enrolled at a given date. This does not represent all of the students enrolled in community colleges nor does it always represent the peak enrollment at any one time. It presents a problem at some colleges, such as the Chicago Urban Skills Institute (CUSI) which has five modules during a traditional semester. Hence, only the number of students enrolled in one module are reported for CUSI in this report. The credit hours generated by CUSI during a semester will be five times the credit hours during one module. A footnote to explain this unique difference has been added to the tables to assist those using the data for estimating annual enrollments.

HIGHLIGHTS OF FALL 1979 "END-OF-REGISTRATION" ENROLLMENT REPORT

1. At the "end-of-registration" in the Fall Term 1979 the public community colleges of Illinois enrolled 323,653 students in instructional credit courses, an increase of 1,286 students (+0.4%) from the Fall Term 1978. (See Pages 7 and 8 for further details.)

2. The full-time equivalent (FTE) student enrollment of 142,514 in the community colleges in the Fall Term 1979 was a decrease of 720 FTE students (-0.5%) from the Fall Term 1978. (For further details see Pages 7 and 8.)

3. The number of full-time students enrolled in the community colleges of Illinois has decreased for the fourth consecutive year from a high of 100,409 full-time students in the Fall Term 1975 to 80,854 full-time students in the Fall of 1979. The number of part-time students enrolled during the Fall of 1979 was 242,799 (a 1.3% increase from the Fall of 1978) which represented 75% of all students enrolled. (See Pages 13 and 32 for details.)

4. Annual unduplicated student headcount enrollment in the public community colleges during FY1979 was 562,213 which was 1.75 times the Fall Term 10th day headcount enrollment of 322,367 for FY 1979. (For details see Pages 7 and 10.)

5. The enrollment of female students has increased from 178,206 in the Fall of 1978 to 180,479 in the Fall of 1979 (an increase of 2,273 - 1.3%) while the number of male students decreased slightly from 143,491 in the Fall of 1978 to 143,174 in the Fall of 1979. (See Pages 13 and 32.)

6. Illinois community colleges enroll students predominately residing within the college district boundaries (94.4% of total), with 5.1% of the students being out-of-district and only 1,614 (0.5%) being students with out-of-state or foreign residency. (For details see Pages 14 and 33.)

7. Although the majority of the course enrollments (66.0%) occur during the day (7:00 a.m. to 5:00 p.m., Monday through Friday), a substantial portion (31.9%) occur during the evening (5:00 p.m. to 6:59 a.m., Monday through Friday) and 2.1% of the course enrollments occur on Saturday and/or Sunday. (See Pages 18 and 41.)

8. A comparison of headcount enrollments with district populations at each Illinois community college showed that an average of 3% of the population is enrolled in the community colleges. The rate of enrollment varies from a low of 1.67% to a high of 8.69% of the population of the district at the various community colleges. (See Pages 16 and 38.)

9. The analysis of student enrollment by ages revealed that the median age of community college students enrolled during Fall Term 1979 was approximately 24.8 years, which is similar to the results obtained in 1978. The traditional college age population is 18 through 23, and the students attending community colleges directly after completing

high school are 18 through 21 years of age. Approximately 53% of the community college enrollments this past fall were age 24 or older. This shows that many non-traditional students are attending the community colleges. (For details see Pages 15 and 35.)

10. The analysis of the Fall Term 1979 enrollment by ethnic origin showed that the Illinois community colleges enrolled a substantial number of minority students. The distribution of enrollments by ethnic origin was as follows: Black - 18.2%, American Indian or Alaskan - 0.5%, Asian or Pacific Islander - 1.7%, Hispanic - 5.1%, and White - 74.5%. (See Pages 14 and 34.)

11. An analysis of the enrollments by student major in the various educational program areas revealed that the baccalaureate area had decreased 10.9% from the Fall Term 1978, while the occupational program area had increased 0.8%. (For details see Pages 11 and 31.)

12. The five baccalaureate curricula with the largest enrollments were Liberal Arts and Sciences (51,075), Business General (9,198), Natural Science (4,383), Liberal Studies (3,317), and Business Administration (3,276). (For details see Pages 26 through 29.)

13. The five occupational curricula with the largest enrollments were Registered Nursing (7,989), Secretarial Technologies (6,886), Accounting (6,648), General Business (5,917), and Business and Marketing (4,907). (See Pages 26 through 29.)

Student Enrollment by Community College

A comparison of student headcount enrollment for the Fall Term 1979 with data from a year ago shows that of the 51 community colleges, 26 have experienced an increase in enrollment, and 25 have experienced an enrollment decrease. The net increase for all the community colleges in Illinois was 1,286 students. The total student headcount of 323,653 was a 0.4% increase from the 322,367 students enrolled during the Fall Term 1978. Table 1 below is a summary of the fall term instructional enrollments from 1973 through 1979.

Of the 51 colleges, 25 have decreased in FTE enrollment, and 26 have shown an increase in FTE enrollment. The net decrease for the community colleges was 720 FTE students. The total FTE enrollments for the 1979 Fall Term was 142,514 which was 0.5% lower than the 143,234 FTE enrollment for the Fall 1978 Term. This is the fourth consecutive year that the community colleges in Illinois have experienced a decrease in fall FTE enrollment. Table 2 on Page 8 shows a comparison of the headcount and FTE enrollments by each community college.

Table 1

SUMMARY OF THE FALL TERM INSTRUCTIONAL CREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FROM 1973 THROUGH 1979

	FALL'73	FALL'74	FALL'75	FALL'76	FALL'77	FALL'78	FALL'79
Headcount	226,101	257,365	315,751	324,586	329,778	322,367	323,653
Annual Change	+23.4%	+13.8%	+22.7%	+2.8%	+1.6%	-2.2%	+0.4%
FTE	114,265	124,392	157,111	143,249	149,333	143,234	142,514
Annual Change	+5.2%	+8.9%	+25.3%	-2.5%	-2.6%	-4.1%	-0.5%

Figure 1 on Page 9 illustrates the annual change of community college enrollments from 1965 through 1979. A detailed distribution of headcount and FTE enrollment by community colleges can be found on Tables 13 and 14 on Pages 20 through 23 in Appendix A.

Annual Unduplicated Headcount Enrollment

As pointed out earlier, this Enrollment Report utilizes the Fall Term 10th day student count for most of the enrollment analysis. The community colleges continue to enroll many more students after the 10th day of the term than public colleges and universities because of their many short-term courses and because of the part-time objectives of many of the students. Table 3 on Page 10 shows a comparison of the fall 10th day enrollment with total (cumulative) fall enrollment and with the annual unduplicated enrollments for FY 1979. This table shows that some colleges enroll over twice as many students on an annual basis as are included in their 10th day fall headcount enrollments. Overall, the community colleges of Illinois enrolled over 562,000 students in instructional credit courses during FY 1979. This compares to 322,367 students who were counted as of the Fall Term 10th day reporting period.

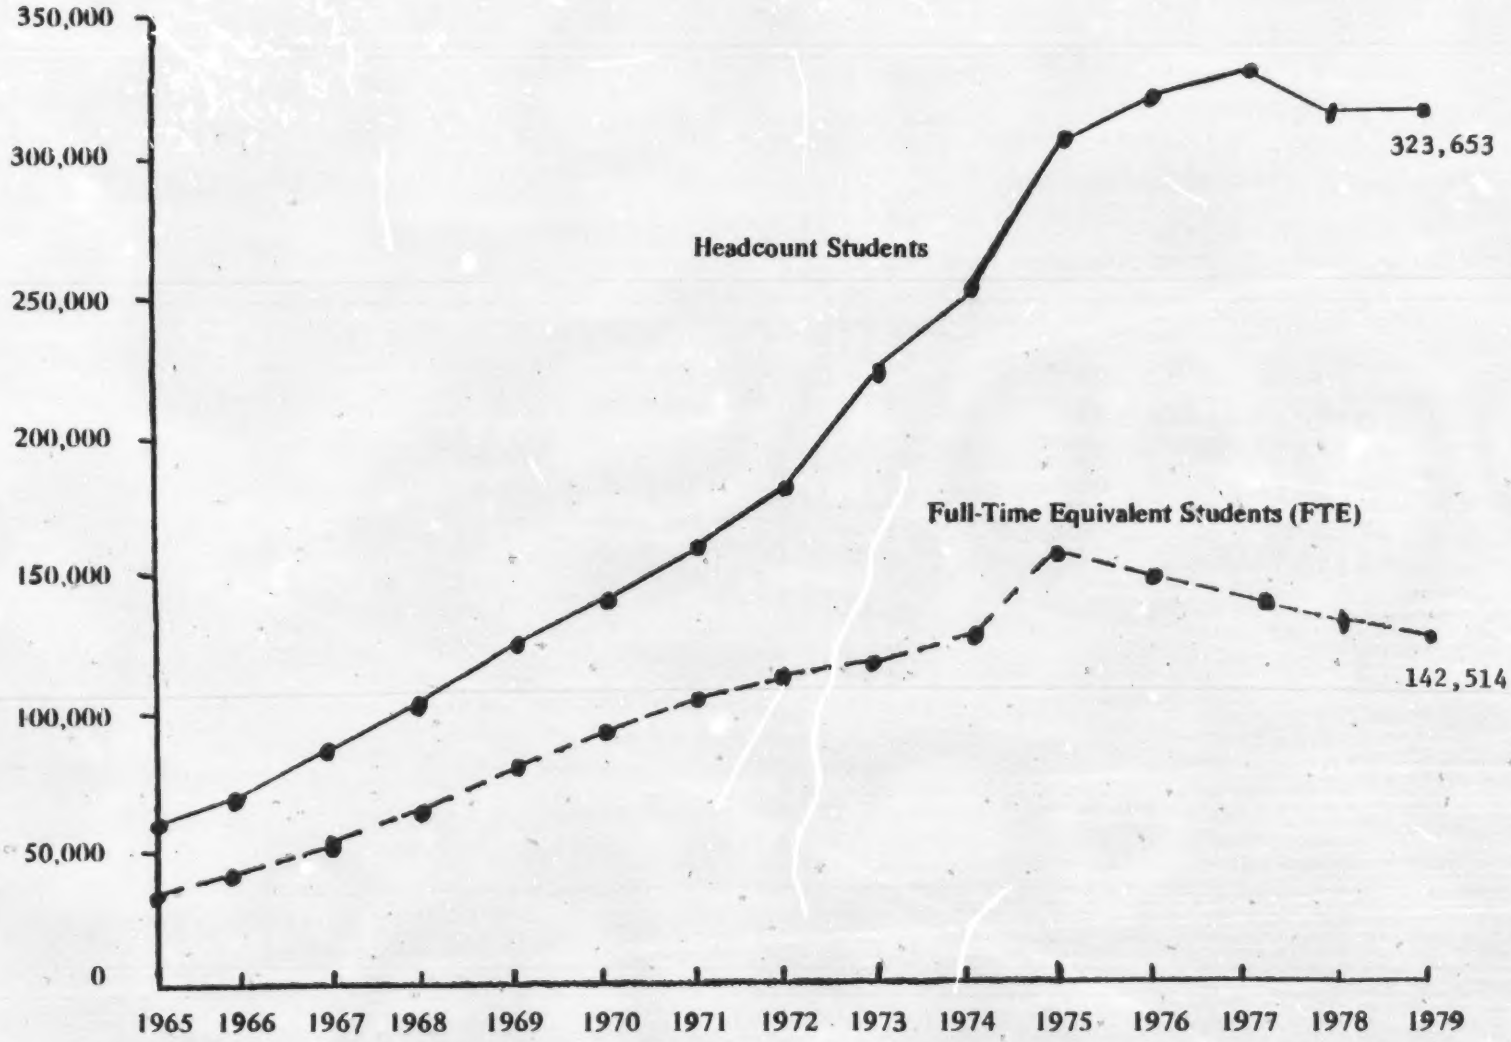
Illinois Community College Board
Table 2
COMPARISON OF FALL 1979 HEADCOUNT AND FTE ENROLLMENTS IN INSTRUCTIONAL PROGRAM AREAS
WITH FALL 1978 HEADCOUNT AND FTE ENROLLMENTS (END OF REGISTRATION - 10TH DAY OF THE TERM)

	Fall 1978 Headcount	Fall 1979 Headcount	Number Change 1978 to 1979	Percent Change 1978 to 1979	Fall 1978 FTE	Fall 1979 FTE	Number Change 1978 to 1979	Percent Change 1978 to 1979
State Totals	322,367	323,653	+1,286	+ 0.4%	143,234	142,514	- 720	- 0.5%

NOTE: Statistics from the individual colleges were deleted because of irreproducibility.

Figure 1

FALL TERM HEADCOUNT AND FTE ENROLLMENT IN INSTRUCTIONAL PROGRAM AREAS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FROM 1965 TO 1979



Illinois Community College Board
Table 3

COMPARISON OF FALL 1978 (FY 1979) 10TH DAY HEADCOUNT ENROLLMENT
WITH CUMULATIVE ENROLLMENT AND TOTAL ANNUAL FY 1979 ENROLLMENT

	Fall 1978 (FY 1979) 10th Day Headcount	Fall 1978 (FY 1979) Cumulative Headcount	Total Annual* FY 1979 Headcount
State Totals	322,367	345,030	562,213

* Annual headcount includes enrollment in all terms (summer, fall, winter, and spring) and students who enroll after the 10th day of the term (cumulative count). Counts are based on enrollment data submitted to the ICCB by each college on E-cards.

Note: Statistics from the individual colleges were deleted due to irreproducibility.

Analysis of Enrollments by Instructional Area

A summary of the total student headcount enrollment by instructional program area for all public community colleges in Illinois from the Fall Term 1975 through the Fall Term 1979 is shown in Table 4 below. These data show that the Vocational Skills area has experienced the largest decreases in enrollment every year since the Fall Term 1976. It should be noted that the undeclared area has increased greatly since 1975. The reason for the large increase could be due to the fact that a large number of colleges do not require students to declare a major and that many part-time students do not select a particular program area when taking a limited number of courses. (For a detailed distribution of enrollment by instructional area for each college during the Fall Term 1979, see Table 17 on Page 31 in Appendix C.)

Table 4

SUMMARY OF STUDENT HEADCOUNT ENROLLMENT IN INSTRUCTIONAL PROGRAM AREAS AS CLASSIFIED BY STUDENT CURRICULUM MAJOR FROM FALL 1975 THROUGH FALL 1979

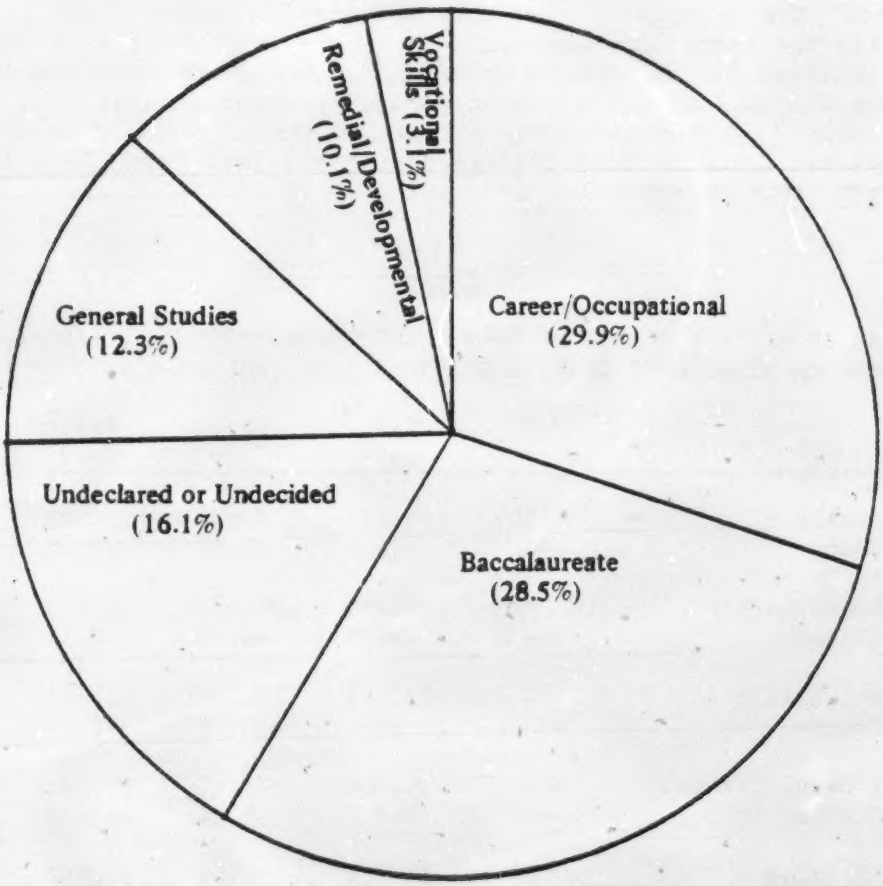
Program Area	Fall 1975	Fall 1976	Fall 1977	Fall 1978	Fall 1979
Baccalaureate	109,566	106,624	102,843	103,462	92,138
Annual Change	---	-2.7%	-3.5%	+0.6%	-10.9%
Occupational/Career	101,988	105,476	109,474	95,876	96,680
Annual Change	---	+3.4%	+3.8%	-12.4%	+0.8%
Vocational Skills	---	22,003	14,659	11,769	10,217
Annual Change	---	---	-33.4%	-19.7%	-13.2%
Remedial/Developmental	---	35,895	37,610	32,491	32,845
Annual Change	---	---	+4.8%	-13.6%	+1.1%
General Studies	90,936*	37,766	30,861	40,552	39,693
Annual Change	---	---	-18.3%	+31.4%	-2.1%
Undeclared	13,261	16,822	34,331	38,217	52,080
Annual Change	---	+26.8%	+104.1%	+11.3%	+36.3%
TOTAL	315,751	324,586	329,778	322,367	323,653

*Included vocational skills and remedial/developmental students in 1975.

Figure 2 on Page 12 shows the distribution of the Fall 1979 enrollment by instructional program.

Figure 2

FALL TERM STUDENT HEADCOUNT ENROLLMENT BY INSTRUCTIONAL PROGRAM AREA IN ILLINOIS PUBLIC COMMUNITY COLLEGES



The public community colleges of Illinois are comprehensive in terms of their broad curricular offerings. During the 1979 Fall Term, the 39 community college districts (51 individual campuses) reported enrollments in a combined total of 3,072 educational curricula in 175 different HEGIS classifications. Tables 15 and 16 in Appendix B show a detailed distribution of the Fall 1979 curriculum offerings by two-digit and four-digit HEGIS instructional program areas.

It must be noted that a HEGIS classification is fairly broad and often includes several distinctly unique curricula. For example, in the HEGIS classification "5306 Automotive Technologies," a variety of specialized certificate and degree curricula (such as Automotive Mechanics, Auto Body Repair, and Auto Power Service) were offered in the community colleges of Illinois.

Greater Increase in Part-Time Students

The part-time student enrollment in the community colleges has been increasing steadily since the Fall 1974 Term, while the full-time enrollment has been decreasing since the Fall 1975 Term. The drop in full-time enrollment experienced in the Fall 1976 Term was repeated in Fall 1978 and Fall 1979. Table 5 shows a summary of full-time and part-time headcount enrollment from Fall 1974 through Fall 1979. Table 18 on Page 32 in Appendix C shows a detailed distribution by college for Fall 1979.

Table 5

SUMMARY OF FULL-TIME AND PART-TIME HEADCOUNT ENROLLMENT
FROM FALL 1974 THROUGH FALL 1979

	FALL 1974	FALL 1975	FALL 1976	FALL 1977	FALL 1978	FALL 1979
Full-Time Students	78,865	100,409	94,657	94,766	82,606	80,854
Annual Change	---	+27.3%	-5.7%	+0.1%	-12.8%	-2.1%
Part-Time Students	175,500	215,342	229,929	235,012	239,761	242,799
Annual Change	---	+22.7%	+6.8%	+2.2%	+2.0%	+1.3%

Female Students Increasing/Male Students Decreasing in Illinois Community Colleges

Table 6 below show the summary of male and female student headcount enrollment from Fall 1974 through Fall 1979. The summary shows that the number of female students has been increasing dramatically in recent years (except for Fall 1978) while the number of male students has been on the decline since Fall 1975. (See Table 18 on Page 32 in Appendix C for a distribution by college for Fall 1979.)

Table 6

SUMMARY OF MALE AND FEMALE STUDENT HEADCOUNT ENROLLMENT
FROM FALL 1974 THROUGH FALL 1979

	FALL 1974	FALL 1975	FALL 1976	FALL 1977	FALL 1978	FALL 1979
Male	125,813	155,034	153,360	150,036	144,161	143,174
Annual Change	---	+23.2%	-1.1%	-2.2%	-3.9%	-0.7%
Female	131,552	160,717	171,336	179,742	178,206	180,479
Annual Change	---	+22.2%	+6.5%	+5.0%	-0.9%	+1.3%

In-District Students Make Up 95% of the Community College Enrollment

The community colleges of Illinois predominately enroll students who reside in their own districts. The table below shows that of the 323,653 students enrolled in community colleges during the Fall 1979 Term, 305,660 (94.4%) were in-district students, while 16,379 (5.1%) of the students were out-of-district students and only 1,614 (0.5%) were out-of-state or foreign students. (See Table 19 on Page 33 in Appendix C for further details by college.)

Table 7

SUMMARY OF FALL 1979 ENROLLMENT IN THE ILLINOIS PUBLIC COMMUNITY COLLEGES DISTRIBUTED BY TYPE OF RESIDENCY

Category	Headcount	% of Total
In-District	305,660	94.4%
Out-of-District	16,379	5.1%
Out-of-State	862	0.3%
Foreign	752	0.2%
Total	323,653	100.0%

Substantial Number of Minority Students Enrolled in Community Colleges

The analysis of enrollment by ethnic origin shows that the community colleges of Illinois enroll a substantial number of minority students. The distribution is as follows: Black - 18.2%, American Indian or Alaskan - 0.5%, Asian or Pacific Islander - 1.7%, Hispanic - 5.1%, and White - 74.5%. The table below shows the percent of student enrollment by ethnic origin from Fall 1973 through Fall 1979. The proportion of Black Americans enrolled in community colleges reached its peak in 1975. Table 20 on Page 34 in Appendix C shows the distribution by college for Fall 1979.

Table 8

SUMMARY OF PERCENT OF STUDENT ENROLLMENT BY ETHNIC ORIGIN FROM FALL 1973 THROUGH FALL 1979

	Black	Indian or Alaskan	Asian or Pacific Islander	Hispanic	White
1973	17.7%	0.3%	0.6%	1.9%	79.5%
1974	19.9%	0.4%	0.7%	4.9%	74.1%
1975	20.5%	0.4%	0.6%	4.5%	74.0%
1976	18.4%	0.4%	1.4%	4.8%	75.0%
1977	16.0%	0.7%	0.9%	2.4%	80.0%
1978	18.8%	0.4%	2.7%	5.0%	73.1%
1979	18.2%	0.5%	1.7%	5.1%	74.5%

Analysis of Student Enrollment by Age

The median age of all students enrolled in Illinois public community colleges during the Fall 1979 Term was 24.8. However, it must be noted that 27,077 students (8.4% of the total) were enrolled in community colleges with unreported ages.

Table 9 below shows the distribution of both headcount and FTE enrollments for Fall 1979 students be age categories. It should be noted that although the group of students less than 25 years old make up 51% of the headcount, they represent over 66% of the total FTE. This would indicate that this group contains many full-time students. The Fall 1979 enrollment distributed by age for each community college can be found in Table 21 on Page 35 in Appendix C.

Table 9

SUMMARY OF FALL 1979 HEADCOUNT AND FTE ENROLLMENT
IN INSTRUCTIONAL PROGRAMS DISTRIBUTED BY AGE.

AGE CATEGORIES	HEADCOUNT	% OF TOTAL REPORTED	FTE	% OF TOTAL REPORTED
16 or less	2,155	0.7%	515	0.4%
17-20	94,970	32.0%	63,224	48.0%
21-24	53,628	18.1%	23,332	17.7%
25-30	53,261	18.0%	19,834	15.0%
31-39	44,190	14.9%	13,465	10.2%
40-55	32,095	10.8%	8,159	6.2%
Over 55	16,277	5.5%	3,245	2.5%
TOTAL REPORTED AGE	296,576	100.0%	131,774	100.0%
UNREPORTED AGE	27,077		10,740	
TOTAL	323,653		142,514	

Status of Students

An analysis of the academic classification of community college students showed that 180,505 (56%) students were freshmen, 45,152 (14%) were sophomores, and 97,996 (30%) were unclassified. A detailed distribution of students by academic classification is shown for each college in Table 22 on Page 36 in Appendix C.

An analysis of the enrollment status of community college students during the Fall 1979 Term showed that 126,682 (39%) of the students were enrolled in college for the first time, 13,608 (4%) were transfer students from other colleges and universities, and the rest of the students were either continuing or re-admitted students. The table below shows a State summary of the enrollment status of Fall 1979 community college students. Table 23 on Page 37 in Appendix C shows the distribution of students by enrollment status for each community college.

Table 10
STATE SUMMARY OF FALL 1979 COMMUNITY COLLEGE STUDENTS BY ENROLLMENT STATUS

	First Time Students	Transfer Students	Continuing Students	Re-admitted Students	Total Students
Number of Students	126,682	13,608	152,190	31,173	323,653
Percent of Total	39.2%	4.2%	47.0%	9.6%	100.0%

Nearly 3% of the Population Enrolled in Community Colleges During Fall Term

An analysis of the proportion of the population enrolled in each community college district is shown in detail in Table 24 on Page 38 in Appendix C. This analysis shows that the individual community colleges enroll from a low of 1.67% to a high of 8.69% of their district's population. On a statewide basis 2.95% of Illinois population were enrolled in a community college during the Fall 1979 Term. It seems that colleges with large continuing education programs and ones that have special programs for older adults enroll a higher proportion of their district's population. This analysis indicates that there is considerable potential for additional students in many community college districts.

FTE Enrollment by Type of Course

Table 25 on Page 40 in Appendix C shows the actual Fall 1979 10th day FTE enrollment by the eight instructional categories for each of the public community colleges in Illinois. The distribution into the various categories was based on course enrollments by PCS (Program Classification Structure) and HEGIS (Higher Education General Information Survey) codes. Of the 142,393 FTE students reported, the baccalaureate and general academiccategory showed the largest enrollment, 74,583 (52.4%) of total; Business, Personal Service, and Public Services with 15.3%; Natural Science and Industrial Technologies with 9.7%; and Remedial/Developmental with 6.4% were next. Table 11 below shows a comparison of Fall 1978 FTE enrollment by type of course with Fall 1979 figures as well as the percent change from Fall 1978 to Fall 1979.

Table 11
COMPARISON OF FALL 1978 10TH DAY FTE ENROLLMENT
BY TYPE OF COURSE WITH FALL 1979 ENROLLMENT

Type of Course	Fall 1978 FTE Enrollment	Fall 1979 FTE Enrollment	% Change From 1978 to 1979
Baccalaureate & General Academic	74,524	74,583	+ 0.1%
Business, Personal Service & Public Service	23,731	21,785	- 8.2%
Data Processing & Commerce Technologies	6,594	7,163	+ 8.6%
Natural Science & Industrial Technologies	13,687	13,768	+ 0.6%
Health Technologies	7,966	7,656	- 3.9%
Review Vocational Skills	2,821	2,425	-14.0%
Remedial/Developmental Instruction	9,834	9,134	- 7.1%
Other General Studies	5,526	5,879	+ 6.4%
Totals	144,683*	142,393*	- 1.6%

* Total FTE does not correspond with FTE enrollment presented elsewhere in this report due to the fact that several colleges reported only those courses for which apportionment is paid and excluded enrollments for courses where no State aid is claimed.

Table 26 on Page 41 in Appendix D shows the FTE student enrollment in each of the public community colleges in Illinois by time of attendance--day, evening, and Saturday and/or Sunday. Day attendance is defined to be enrollment in classes which meet Monday through Friday between the hours of 7:00 a.m. and 4:59 p.m. Evening classes are ones which meet between the hours of 5:00 p.m. and 6:59 a.m. Monday through Friday. Saturday and Sunday classes are ones which meet anytime on Saturday or Sunday. Fall 1979 was the first year that the data for time of attendance included the distribution for eligible occupational day FTE. These data are needed to determine space needs at the community colleges. Previously this data was collected on Table 1.3 in the Capital Section of the RAMP/CC (Resource Allocational and Management Plan/Community Colleges) document. Table 12 below shows a summary of FTE enrollment by time of attendance for Fall 1979. Day attendance accounts for the largest segment in the community colleges of Illinois (66.0% of the total) although evening attendance makes up a substantial part of the total FTE enrollment (31.9% of the total).

Table 12
SUMMARY OF FALL 1979 FTE ENROLLMENT BY TIME OF ATTENDANCE

Time of Attendance	Fall 1979 FTE Enrollment	Percent of Total
Total Eligible Occupational Day FTE	19,051	13.4%
Total Other Day FTE	74,913	52.6%
Total Day FTE	93,964	66.0%
Total Evening FTE	45,508	31.9%
Total Saturday/Sunday FTE	3,000	2.1%
TOTAL FTE	142,472*	100.0%

* It should be noted that since FTE enrollments by time of attendance were reported by course and submitted to the ICCB on separate forms, the total enrollments for some colleges are slightly different from those reported elsewhere.

Enrollment Analysis by Age, Program of Enrollment, and Student Characteristics

An analysis of the age of students enrolled in instructional programs can be found on Table 27 on Page 43 in Appendix E. This table shows the State composite picture of the students enrolled in the community colleges of Illinois during the Fall 1979 Term. Not only a distribution by age, but by program area, sex and full-time and part-time students is presented. This table can be utilized to get a picture of what the entire community college system is showing in terms of enrollment. Tables reflecting data shown on Table 27 for individual community colleges can be found in Appendix C in this report.

Table 28 on Page 44 in Appendix E presents a statewide analysis of first-time freshmen enrolled in the community colleges of Illinois. The student headcount enrollment is distributed by age, sex, program area, and full-time and part-time students.

Appendices A through E were removed prior to the document's submission to the ERIC Document Reproduction Service.
